

Q-Ray Console 24 - Data Sheet

Product Description

Lighting control console with 18 dedicated device faders, 6 configurable memory faders and a crossfader. All Ray Consoles contain an extendable software, so that you only pay for the functions you need. Rich feedback is provided by over 400 leds and a intuitive touch screen, enabling a novice user to quickly start creating lighting. All Ray Console products are engineered to last, with quality components and strong mechanical design. This console is an excellent long term investment.
