

DATA SHEET
PX724
Gate 4
DMX RDM

Device description

Gate 4 DMX RDM is a gate that converts Art-Net signals to four output DMX-RDM ports. From software version 1.01, the device also allows conversion of DMX512 signal to Art-Net. The device is designed to run from 230V AC mains. This gate has a solid, metal housing protecting against mechanical damage.

The device comes equipped with an Ethernet interface working in 10/100BaseTX protocol. The gate offers two modes of merging signals from two sources: HTP and LTP. The protocol version used is Art-Net 4 (compatible 1 – 4).

The DMX512 ports are optically isolated XLR connectors, resistant to mechanical damage.

In addition, on the device there are six LED indicator lights: two network ones and four showing port's status.

The gate has a display and four buttons that allow to change the configuration: Art-Net, Ethernet and DMX settings (such as: Brake, MAB, MBF, and the number of DMX channels transmitted).

The user can order additional components to be shipped with the device, allowing for: installation of a single gate in a RACK cabinet, installation of two gates in a RACK cabinet, suspending a gate (e.g. from a truss).

Technical drawing

Connection diagram

Technical data

type	PX724
DMX/RDM lines	4
DMX/RDM input	socket 3-pin or 5-pin Neutrik XLR
RDM protocol support	yes
bi-directional signal conversion	yes
optically isolated XLR connectors	yes
galvanic isolated XLR connectors	yes
Ethernet connector type	Neutrik etherCON
DHCP protocol support	yes
Art-Net version	Art-Net 1, 2, 3, 4
communication method:	Art-Net, display and buttons
firmware update	through Art-Net 4 protocol
default user presets	2 (2.x.x.x and 10.x.x.x)
indications mode	Normal, Mute, Identify
“No signal Art-Net” mode	yes (holding last value)
synchronous mode support	yes
dark mode (screensaver)	yes
user interface	2 x 16 LCD display, 4 x buttons, 4 bi-color diodes, 2 single-color diodes
power supply	230V AC PowerCON TRUE1 Neutrik
power consumption	8W
weight	1.2kg
dimensions	width: 205mm height: 42,5mm depth: 155mm

Mounting systems

<p>D357-H1 (short and long side handle)</p>	 <p>The image shows the PX 357 Gate 4 DMX device with its D357-H1 mounting system. The device is a black rectangular unit with four DMX outputs (1-4) and an Ethernet port. The short side handle is a small L-shaped bracket, and the long side handle is a long, thin bracket with a hole at the end for mounting.</p>
<p>D357-H2 (2 x short side handle and connector)</p>	 <p>The image shows the PX 357 Gate 4 DMX device with its D357-H2 mounting system. The device is shown with two short side handles and a connector. The short side handles are L-shaped brackets, and the connector is a small rectangular piece that fits between the two handles to secure the device.</p>
<p>D357-H3 (suspension bracket)</p>	 <p>The image shows the PX 357 Gate 4 DMX device with its D357-H3 suspension bracket. The device is shown with the suspension bracket, which is a U-shaped bracket with four holes for screws, designed to hold the device in place.</p>
